Receipt is acknowledged of IDS, Declaration, of 3/2/02 and 1/24/02 respectively.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, 44-56, drawn to a complex, classified in class 516, subclass 99.
- II. Claims 11-21, drawn to method for preventions, classified in class 427, subclass 1+.
- III. Claims 22-31, drawn to method for delaying, classified in class 424, subclass 403.
- IV. Claims 32-43, drawn to surfaces, classified in class 2, and subclass 4.

The inventions are distinct, each from the other because of the following reasons:

The complex of Group I is independent and patentably distinct from the methods of prevention, delaying and the surfaces of Group II, III and IV, as other products, such as baking soda, could be used in II and III, and surfaces other Than skin and towels, such as plants, could be addressed with the complexes of I.

The Group I have acquired a separate status in the art as shown by their different classification, have acquired a separate status in the art because of their recognized divergent subject matter, the search for any other Group, and a search and examination of the entire application would place an undue burden on the Examiner, the present restriction requirement is proper for examination purposes.

This application contains claims directed to the following patentably distinct species of the claimed invention: species of clays, as of claim 3 or 4.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-56 are generic.

This application contains claims directed to the following patentably distinct species of the claimed invention: species of Ligand, as of claim 6.

This application contains claims directed to the following patentably distinct species of the claimed invention: species of pharmaceutical – insect repellent, sunscreen, or mixture.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-56 generic.

This application contains claims directed to the following patentably distinct species of the claimed invention: species of surface: skin, cloth.

This application contains claims directed to the following patentably distinct species of the claimed invention: species of application, solution, gel, aerosol, towelette, pump or *Spray*.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 22-32 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Because the above restriction/election requirement is complex, a telephone call to applicant's agents to request an oral election was not made. See M.P.E.P. Sec. 812.01.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Neil Levy whose telephone number is (703)308-2412. The examiner can normally be reached on Tuesday through Friday 7 AM to 5:30 Pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jose Dees can be reached on (703) 308-4628.
